

**12th.09.2023**

---

On behalf of Boosted Technologies LTD, I present to you the default configurations and access to the sympathyafrica.org website code and email services.

Further, it should be noted that Sympathy Africa is hosted on Boosted Technologies' Hosting service as the cost for hosting in the previous discussions wasn't included.

The original amount of 350K included development of the website with a domain purchase which has been on this date of 12.09.2023 effected.

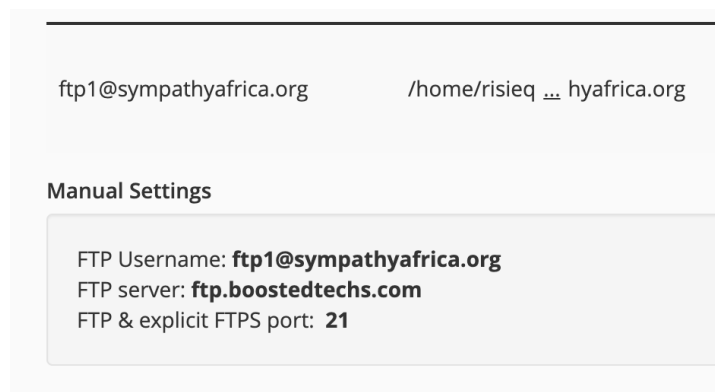

To access the control panel for the service shall be through FTP unless migration preparations are made so that the website gets its own hosting plan that usually ranges to 220K a year depending on the service provider.

Here are the email credentials.

[info@sympathy africa.org](mailto:info@sympathy africa.org) password: +tgHbt(26Mob

The email can be accessed through <https://www.sympathy africa.org/webmail>

Here is the FTP access to the website.

FTP password: mh1tb@)1gw#Q

And here is the Website's source code on github.

<https://github.com/boosted-techs/sympathy>

That repository contains the project's source code.

**NB. The website has 15 pages. ANY other changes or amendments are to attract UGX 25K per change paid on change request submission.**

---

Yours  
Ashiraff Tumusiime
